ELSEVIER

J. Biochem. Biophys. Methods 30 (1995) 321–323

JOURNAL OF
biochemical and
biophysical
methods

Contents of Volume 30

No. 1

N. Nagesh and D. Chatterji (India)
Ammonium ion at low concentration stabilizes the G-quadruplex formation by telomeric sequence 1

L.-H. Lek, E.-B. Yang, D [illegible] Wang and L.-Y. Cheng (Singapore)
Comparison of the sensitivity of different India inks staining of electro-blotted proteins on filter membranes 9

F.-L. Yu and W. Bender (USA)
Studies on the isolated transcriptionally active and inactive chromatin fractions from rat liver nuclei 21

P.G. Stanton, Z. Shen, E.A. Kecorius, P.G. Burgon, D.M. Robertson and M.T.W. Hearn (Australia)
Application of a sensitive HPLC-based fluorometric assay to determine the sialic acid content of human gonadotropin isoforms 37

U. Mrowietz and G. Jürgens (Germany)
A method for the determination of leukocyte migration for large sample numbers by automated densitometric quantification 49

T. Nyholm, M. Andäng, G. Hotchkiss, T. Härd, H. Baumann, S. Larsson and L. Ährlund-Richter (Sweden)
A method for production of $^{13}C/^{15}N$ double labelled RNA in *E. coli*, and subsequent in vitro synthesis of ribonucleotide 5′ triphosphates 59

P. Gopalakrishna and A. Khar (India)
Comet assay to measure DNA damage in apoptotic cells 69

C. Tauer, A. Buchacher and A. Jungbauer (Austria)
DNA clearance in chromatography of proteins, exemplified by affinity chromatography 75

T.K.S. Kumar, B. Raman and Ch.M. Rao (India)
Fluorescent staining for proteins on polyacrylamide gels with 5-dimethylamino-1-naphthalenesulfonyl chloride (dansyl chloride) 79

K.-C. Lin and D. Shiuan (USA, ROC)
A simple method for DNaseI footprinting analysis 85

Nos. 2,3

B. Rihn, C. Coulais, M.C. Bottin and N. Martinet (France)
Evaluation of non-radioactive labelling and detection of deoxyribonucleic acids. Part one: chemiluminescent methods 91

B. Rihn, M.C. Bottin, C. Coulais and N. Martinet (France)
Evaluation of non-radioactive labelling and detection of deoxyribonucleic acids. Part two: colorigenic methods and comparison with chemiluminescent methods 103

R.J. Zimmerman, K.M. Kanal, J. Sanders, I.L. Cameron and G.D. Fullerton (USA)
Osmotic pressure method to measure salt induced folding/unfolding of bovine serum albumin 113

S.G. Khan, H. Mukhtar and R. Agarwal (USA)
A rapid and convenient filter-binding assay for ras p21 processing enzyme farnesyltransferase 133

P. Oravec and D. Podhradský (Slovak Republic)
High-performance liquid chromatography of amino acids after derivatization with 9-isothiocyanatoacridine 145

P.E. Thompson and M.T.W. Hearn (Australia)
A simple and inexpensive sample-handling method for the semi-preparative RP-HPLC of polypeptides and non-polar peptide derivatives: pre-adsorption of samples 153

T.V. Maltseva, V.F. Zarytova and J. Chattopadhyaya (Sweden, Russian Federation)
Base-pair exchange kinetics of the imino and amino protons of the 3′-phenazinium tethered DNA–RNA duplex, r($^{5'}$GAUUGAA$^{3'}$):d($^{5'}$TCAATC$^{3'}$-Pzn), and their comparison with those of B-DNA duplex 163

C. Crespi, G. Gastalver, A. Palou and P. Roca (Spain)
Enzymatic determination of carbon (^{14}C)-labeled glycerol in biological samples 179

T.K. Kundu, A.R. Meetei and B.R. Srinath (India)
A method for in vivo [^{32}P]phosphate labelling of testis proteins 185

S. Garrido, E. Zaera, A. Torrecilla, A. Sillero and M.A.G. Sillero (Spain)
Labeled adenosine(5′)tetraphospho(5′)adenosine (Ap_4A) and adenosine(5′)tetraphospho(5′)-nucleoside (Ap_4N). Synthesis with firefly luciferase 191

B. Schoel, M. Welzel and S.H.E. Kaufmann (Germany)
Quantification of protein in dilute and complex samples: modification of the bicinchoninic acid assay 199

R. Ghildyal and M. Kariofillis (Australia)
Determination of triasulfuron in soil: affinity chromatography as a soil extract cleanup procedure 207

No. 4

Research Articles

G. Dasari, I. Prince and M.T.W. Hearn (Australia)
Investigations into the rheological characteristics of bovine amniotic fluid 217

M. Erben, S. Decker, H. Franke and H.-J. Galla (Germany)
Electrical resistance measurements on cerebral capillary endothelial cells – a new technique to study small surface areas 227

E.G. Janzen, J.L. Poyer, C.F. Schaefer, P.E. Downs and C.M. DuBose (USA)
Biological spin trapping II. Toxicity of nitrone spin traps: dose-ranging in the rat 239

L. Cobern and P. Selvaraj (USA)
An enzymatic method to determine receptor-mediated endocytosis 249

M.J. Magrisso, M.L. Alexandrova, P.G. Bochev, B.G. Bechev, V.I. Markova and I.C. Benchev (Bulgaria)
Model components of luminol chemiluminescence generated by PMNL 257

A. Ravandi, A. Kuksis, J.J. Myher and L. Marai (Canada)
Determination of lipid ester ozonides and core aldehydes by high-performance liquid chromatography with on-line mass spectrometry 271

C.H. Trad, W. James, A. Bhardwaj and D.A. Butterfield (USA)
Selective labeling of membrane protein sulfhydryl groups with methanethiosulfonate spin label 287

O. Vesterberg (Sweden)
A new luminometer for sensitive quantification by chemiluminescence of specific proteins in microtitre plates and on blot membranes 301
